

Written with themes of **protecting natural salmon**, the Thunder Bay Seiner Series is a contemporary saga exploring the intertwined lives and loves of commercial fishing brothers, working in the rough waters of untamed, wild Alaska.

Rocky Bay theme: Wild salmon are threatened by diseased hatchery stocks. Overproduction by hatcheries threaten all salmon stocks, other marine life, and waterfowl.

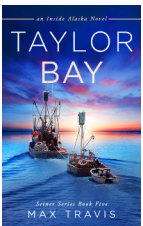

Res Bay theme: Aquaculture association seeks 100% allocation of local salmon run for cost-recovery, halting commercial, sport, and subsistence harvesting. (Yes, they actually tried this.)

K Bay theme: Habitat protections are needed yet ignored by aquaculture association. Fisherman take action.

Windy Bay theme: Wild salmon—natural runs—are the only sustainable resource. The best returns are where aquaculture has not touched the fish.

Taylor Bay theme: Aquaculture control of weir is over! Damages that hatcheries do becomes a national/global issue.

Why novels?

To educate the public and advocate for salmon protection via an interesting story.

And these are good stories!

More!

Aialik Bay brings the natural runs back after a hatchery is closed. **Versa Bay** introduces the Yukon-Kuskokwim disaster and the damage trawlers are doing to oceans and fish stocks. **Secret Bay** addresses wetlands, habitat management, and repurposing hatcheries. **Midnight Bay** goes deeper into the Y-K issues.

Please help spread the stories. Read, review, and share.
